

What Parents & Carers Need to Know about AMONG US

WHAT ARE THE RISKS?

SENSITIVE PREMISE

In Among Us, up to three players are secretly assigned to be alien imposters, tasked with murdering their colleagues while the survivors try to unmask them. While the concept's not far removed from traditional games like Wink Murder or TV shows such as The Traitors, some parents may feel uncomfortable about their child playing a video game in which deception and killing are prioritised.

VIRTUAL VIOLENCE

The on-screen death of characters may be fundamental to the gameplay of Among Us, but the majority of the animations depicting this are deliberately cartoonish and only appear very briefly. However, it is worth bearing in mind that the game has a PEGI age rating of 7 – meaning that certain elements (however heavily stylised they may be) could still upset some younger players.

CHAT BETWEEN PLAYERS

With up to 15 people participating in each game online, a large part of Among Us' appeal is speculating with fellow players who the imposters might be and making accusations. This dialogue through the in-game text chat can occasionally become heated – and could, of course, involve your child being put into contact with people (including adults) who they don't know in real life.

GOING OFF PLATFORM

While Among Us provides basic ways to communicate, many gamers prefer to use external services such as Discord: a popular app which offers voice and video chat functions. These undeniably make cooperation easier, but also create a potential route for children to hear inappropriate language – or for strangers to message them privately in an environment which isn't regulated by the game itself.

IN-GAME PURCHASES

Among Us is free to download on mobile devices, and costs less than £5 to obtain on console and PC. A related longer-term pitfall, though, is that the game also includes options to pay for upgrades such as removing ads on the mobile version or adding cosmetic touches to characters (such as different costumes). It's certainly possible that a child could spend a significant sum without realising it.

Advice for Parents & Carers

CONSIDER SOFTER ALTERNATIVES

Although Among Us is hugely popular with young gamers, it's possible that some children might find the murder themes unsettling. If so, plenty of similar social deduction games are available (in both digital and traditional board game formats) which downplay the potentially gristlier elements: some centre around undercover spies, for instance, and there's even a Marvel superhero-themed variant.

CHAT ABOUT CHATTING

You might feel it's prudent to talk to your child about the risks associated with voice chat while gaming, explaining in particular that strangers online aren't always who they claim to be. Keeping the conversation relaxed will reinforce your child's confidence that they can always come to you with any online concerns – not just about Among Us, but any potential future issues as well.

DISCUSS DISCORD

In general, Discord is an excellent app for keeping online communities together because of its use of dedicated individual servers, which allow comprehensive control over who can join – and who can't. Once you're familiar with the platform, you could set up a secure server for your child and their friends to communicate during games of Among Us, with no access for people they don't know.

AMONG US, AMONG FRIENDS

When your child and their friends get together, they can enjoy a private game of Among Us by choosing a 'local' lobby – that is, only people connected to the same WiFi (your home network, for example) can enter. This prevents any random online users – who may be total strangers – from joining and removes the need for voice chat, as the players are all physically in the same location.

STOP SURPRISE SPENDING

If you're concerned about the possibility of your child racking up an unexpected bill on Among Us' microtransactions, you could consider using a prepaid card with a set limit. Likewise, you could specify in the game's options that adult authorisation is required for every purchase – or you could make sure that no payment methods are enabled on the device that your child plays the game on.
